SOLUTIONS

The Keystone Fence™

Road culverts are the most common beaver damming problem we encounter. Beavers often dam in culverts because with a little bit of work the entire roadbed becomes a large dam. To a beaver, a road bed with a culvert probably looks like a dam with a hole that must be repaired.

The Keystone Fence™ eliminates beaver damming of culverts. Beaver Solutions™ has installed several hundreds of these devices with a 95% success rate despite the continued presence of beavers. This device eliminates the cost of continued culvert clearing, repairs and trapping.

There are 3 reasons why the Keystone Fence™ is so effective at protecting culverts from beaver damming. First, damming 30 to 50 feet of fence is a lot more work for the beavers than simply plugging a narrow culvert. This discourages damming. See diagram. Second, if beavers begin to dam near the culvert the fence forces their damming away from the culvert which also discourages them. Third, if the beavers are determined to dam the fence, as they dam on the fence the opening that the water flows into becomes wider and wider. Therefore less water is moving through the fence where the beavers are damming. The decreasing water flow through the fence at the point of damming further decreases the damming stimulus for beavers.

Note, any device exposed to the seasons and the beavers will require some maintenance. While our Keystone Fences™ are designed to be very low maintenance, this maintenance is important. Quarterly all floated leaves and sticks should be cleared from the fence in order to keep the beavers from damming on it. When this routine maintenance is performed as recommended, the Keystone Fence™ will remain effective for many years.

Since our customer's satisfaction and our reputation are very important to us, we offer an optional low cost Maintenance Plan. A "Worry-Free Guarantee" is included with every Maintenance Plan at no additional cost. See attached. However, if you prefer to do the maintenance, we are always available to answer any questions at no charge because the success of your flow device, your satisfaction and our good reputation are very important to us.
